

Abdullah Khan

Mechanical Engineer | CNC Machine Operator | Manufacturing & Fabrication

WhatsApp: 0336-9073454 | Cell: 0321-5000736 | Email: saadmuhammad592@gmail.com | [LinkedIn](#) | Address: Rawalpindi, Pakistan

PROFESSIONAL SUMMARY

Mechanical Engineer (DAE Mechanical) with hands-on experience as a CNC Machine Operator and a six-month Advanced IT Course, combining strong mechanical fundamentals with practical shop-floor and computer proficiency.

Skilled in CNC lathe and manual lathe operations including facing, boring, turning, grooving, and knurling, with additional exposure to mechanical design, fabrication, ARC welding, drilling, assembly, and precision measurement.

Proven ability to transform engineering concepts into reliable, production-ready solutions, with a strong focus on quality, safety, and manufacturability.

Effective communicator and collaborative team player, able to work cross-functionally and deliver high-quality machined and fabricated components on schedule.

CORE COMPETENCIES & TECHNICAL SKILLS

- Good Communication Skills
- Teamwork & Cross-Functional Collaboration
- CNC Lathe Machine Operation & Manual Lathe Machine Operation
- Machining Operations: Facing, Boring, Turning, Grooving, Knurling
- Mechanical Design, Fabrication & Product Development
- ARC Welding, Drilling & Assembly
- Precision Measurement & Quality Inspection
- Manufacturability, Safety & Production Readiness

HOW I ADD VALUE TO YOUR COMPANY

- I bring hands-on experience in mechanical design, fabrication, and product development, with a strong focus on quality, safety, and manufacturability.
- I excel at transforming engineering concepts into reliable, production-ready solutions while optimizing performance, durability, and cost.
- My hands-on expertise with machining, welding, assembly, and precision measurement enables me to contribute effectively from day one, collaborate seamlessly with cross-functional teams, and deliver high-quality products on schedule.

FINAL YEAR PROJECT

Design & Fabrication of Multifunction Electric Wheelchair

The Multifunction Electric Wheelchair is a smart, battery-powered mobility solution designed to improve independence, comfort, and patient care for elderly and disabled individuals. It features electric movement, adjustable seat height, and stretcher conversion, reducing caregiver effort while combining multiple healthcare functions into one compact system.

Role & Contribution: Designed and fabricated the wheelchair's base frame and integrated mechanical systems, ensuring structural strength, stability, safety, and durability. Utilized CNC and manual machining, ARC welding, drilling, and precision measurement tools to manufacture and assemble components, including the frame, suspension, lifting, and reclining mechanisms for reliable and comfortable operation.

EDUCATION

- DAE Mechanical | Construction Technology Training Institute (CTTI) - Result Awaited [Grade A expected] | 2023 – 2026
- Matric (Science) | Grade B | 2023

CERTIFICATION / COURSES

- Computerized Numerical Control, Programming & Operation of CNC Turning Machines — CTTI | Jan 2025 | Grade A
- Advanced IT Course (MS Office, Typing, Internet Browsing, Email, Printing, MS Windows & Software Installation, Hardware Concepts) | Institute of Skill Development | Mar 2023 – Aug 2023 | Grade A

TECHNOLOGIES & TOOLS

Tech: MS Office, Typing, Internet Browsing, Email, Printing, MS Windows & Software Installation, Hardware Concepts

Tools: ARC Welding Machine, Drilling Machine & Vernier Caliper

LANGUAGES

English – Good | Urdu – Native
