Wahaj Ahmad Butt

BS Computer Science | National University of Sciences and Technology (NUST)
HOUSE NO. DT 204, , SADIQABAD, St 3, Rawalpindi, Pakistan | +923015031253 | wahajahmedbutt@gmail.com

PROFESSIONAL PROFILE

Highly driven and results-oriented individual with hands-on experience in back-end development, machine learning, and distributed systems. Skilled in Python, JavaScript, PHP, and a variety of frameworks and libraries (React, Laravel, Flask, TensorFlow, PyTorch etc.) to create robust, scalable solutions. Eager to leverage strong problem- solving abilities and collaborative approach to contribute to cutting-edge projects that merge innovation with real-world impact.

EDUCATION

- BS in Computer Science School of Electrical Engineering and Computer Science , 2.9
- Bachelor of Computer Science National University of Science and Technology , ()

WORK & INTERNSHIP EXPERIENCE

N-Rays International

01-Jun-2023 - 31-Aug-2023

- Back End Developer: Collaborated on the development and maintenance of various web applications with other interns.

PROJECTS

Visual Question Answering for Real-World Images

- Designed a VQA model combining convolutional neural networks (ResNet50) for image feature extraction and transformer-based language models (BERT) for question encoding.
- Evaluated on the processed DAQUAR dataset, analyzing performance using accuracy and semantic similarity metrics – reaching a Validation A

Fake Review Detector

- Developed a system to identify fake reviews using advanced natural language processing models (BERT, RoBERTa, XLNet, GPT-2).
- Fine-tuned each model on a labeled dataset of real and fake reviews for classification purposes.

Palingenesis

- Created a chat and video calling Laravel application using Web-RTC for connectivity.
- Made use of JWT web tokens for user authentication and stores data in a MySQL database.
- Also wrote extensive documentation, drawing up ERDs for the relation between various functionalities.

Emotion-Based Music Recognition System

- Created a music recommendation system leveraging artificial intelligence to provide accurate music suggestions based on the user's emotional state, detected via a camera.
- Utilized the FER2013Plus dataset for emotion recognition and ResNet50 as the base CNN model, achieving an 82.7% accuracy.
- The Deezer

TECHNICAL SKILLS

- Tensorflow/pytorch
- Back-end developer
- Html, css, bootstrap, node.js
- React / node.js / apis
- Machine learning
- Office 365

SOFT SKILLS

- Microsoft word, excel, project
- Fast improvisation
- Problem solving and innovation
- English speaking and writing
- Empathy
- Teamwork & collaboration
