WORK & INTERNSHIP EXPERIENCE

RoadGauge Ltd

01-Jul-2024 - 31-Dec-2024

- Communication Systems and Network Lab (03-Jul-2023 - 31-Aug-2023) • Developed a machine learning model using Polynomial Regression to predict battery life cycles for UAVs in disaster management applications, improving predictive accuracy by 23% as measured by a custom dataset from 29 flights. • Created a model using Semantic Segmentation via Unet, that detects buildings • Worked on point cloud processing using open3d in Python, adding modules and optimizing the road asset pipeline. • Created a filtering system based on distance thresholds and normal vectors to enhance precision by segregating points relative to identified planes.
